

# SOLDERING IRONS

## GAS SOLDERING IRONS

### 50W GAS SOLDERING IRON

The advanced IRODA Soldering Iron offers go-anywhere soldering convenience with an equivalent heat capacity of up to 50 Watts. It features an adjustable heat control, cap mounted flint igniter, long life catalyst tip and a huge gas reservoir for up to 1 hour use.

Part Number  
**T2595**

### 70W GAS SOLDERING IRON

The advanced IRODA Soldering Iron offers go-anywhere soldering convenience with an equivalent heat capacity of up to 70 Watts. It features an adjustable heat control, cap mounted flint igniter, long life catalyst tip and a huge gas reservoir for up to 2 hours use.

Part Number  
**T2590**

### 70W GAS SOLDERING IRON KIT

The T2592 kit comprises the IRODA Gas Soldering Iron supplied in a handy carry case with a range of tips and accessories including safety stand, cleaning sponge, solder dispenser, blow torch, hot air blower and hot knife cutter.

Part Number  
**T2592**

### 50W & 70W GAS IRON SPARE

Part Number	Description	Style
T2505	1mm Round	A
T2506	2mm Round	B
T2507	3mm Round	C
T2508	2mm Chisel	D
T2509	3mm Chisel	E
T2510	4mm Chisel	F
T2511	2mm Conical	G
T2512	3mm Conical	H
T2513	Blow Torch	I
T2514	Air Blower	J
T2515	Hot Knife	K

### 120W GAS SOLDERING IRON KIT

The T2601 kit comprises the IRODA T2600 Gas Soldering Iron supplied in a handy carry case with a range of tips and accessories including cleaning sponge, solder dispenser, blow torch, hot air blower and hot knife cutter.

Part Number  
**T2601**

### PROFESSIONAL 120W GAS IRON

The T2600 eliminates the need to run out extension leads every time you want to solder something away from your work bench. This gas powered iron has a huge 120W heating capacity. It features a "one-touch" piezo ignition for super easy starting and a thumb-wheel heat control. The unit can be started and adjusted to the correct heat using one hand and it's so well balanced it can be used for even the most delicate soldering jobs

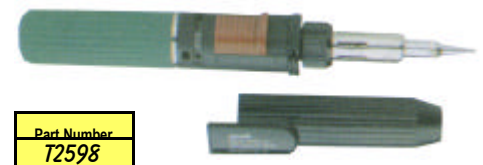

UP TO FOUR HOURS USE FROM A FULL TANK

12 MONTH WARRANTY!

Part Number  
**T2600**

### 120W GAS SOLDERING IRON

Similar to the T2600 below but has a smaller gas reservoir. It is slightly smaller in size and has an all plastic construction. Ideal handyman's soldering iron for those occasional jobs.

Part Number  
**T2598**

### 100W & 120W GAS IRON SPARE

Part Number	Description	Style
T2602	1.6mm Conical	A
T2604	Air Blower	B
T2606	3.2mm Conical	C
T2608	Blow Torch	D
T2610	2.4mm Chisel	E
T2612	3.2mm Chisel	F
T2614	2.4mm Angle	G
T2616	3.2mm Angle	H

## BLOW TORCHES & GAS

### "PRO TORCH" BLOW TORCH

The IRODA Pro Torch is a superb quality, professional hand held or free standing butane torch ideal for brazing, heatshrink, model making, silver soldering and more. It features both gas feed and air volume adjustments providing the flexibility to adjust the type of flame to exactly match the task at hand from a gentle flame to a high temperature jet. The push-to-start and push-to-stop operation means you don't have to keep the button pressed down to keep the torch lit. The Pro Torch also has a stand in the handle base which allows the torch to stand alone on the bench leaving both your hands free, a bonus when brazing or silver soldering small parts. Flame temperature is adjustable up to 1300°C and the piezo ignition system give a reliable start every time. The huge refillable gas chamber allows up to 220 minutes continuous usage time.

**FEATURES:**  
 -Easy start and reliable piezo ignition - Torch stays lit after initial ignition - Gas and air flame adjustments - Up to 1300°C flame temperature - Huge refillable gas chamber - Gas chamber and feed system all metal construction - Ceramic flame guard - Bench stand in handle base - Wind-proof jet flame - Water proof ignition system - Safety ignition lock to prevent accidental lighting

Part Number	Description
T2495	Pro Torch

### FLAMELESS HEAT GUN

Designed to provide flameless heating, not a direct flame, for reducing heatshrink insulation without burning it. Powered by a refillable gas cartridge and with trigger-actuated piezo electric starter, it makes heatshrinking a breeze!

Part Number	Description
T2480	Flameless Heat Gun
T2475	Refillable cartridge to suit

REDUCES HEAT SHRINK QUICKLY & EFFECTIVELY

### "MICRO JET" BLOW TORCH

Powered by a common refillable type gas cartridge, this unique blow torch burns at 1300°C making it ideal for all types of brazing and heavy duty soldering. With its ergonomic design, the Micro Jet can be ignited and used simply with one hand. It has an in-built piezo electronic ignition system which ensures easy lighting every time. Operation of the Micro Jet is very simple. In the one action you press the ignition button and the tool ignites. The flame is only present whilst the ignition button is pressed i.e. When you release the ignition button the flame is extinguished.

**FEATURES:**  
 - Piezo electronic ignition system with safety lock to prevent accidental ignition - Powered by refillable gas cartridge - Allows up to 20 minutes of continuous use - 1300°C flame temperature - Wind proof flame - Water proof ignition - Compact and easy to use.

**IDEAL FOR:**  
 -Workshop, toolbox, work bench etc.  
 - Suitable for heavy duty soldering, brazing, silver soldering, hobbies, model construction etc.

Part Number	Description
T2490	Micro Jet Torch
T2475	Refillable cartridge to suit

### BUTANE GAS REFILL

T2449 - Ideal for gas powered soldering irons. Contents: 100g net.

T2475 - Holds 7.5ml and may be refilled by simply using the T2449. Suits T2480, T2490 only

Part Number	Description
T2475	Small Gas Refill 7.5ml
T2449	Large Can Refill 100g
