

CATEGORY 5 DATA CABLE

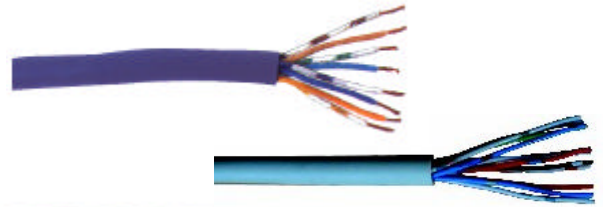

ACA approved, high quality industry standard single conductor, unshielded twisted pair computer network cable.

UTP Cat5e Bulk Cable (Solid Core) with dispenser 305m

Solid core cable is for running over ceilings and through walls and floors. Don't use solid core for patch leads and stuff that moves around a lot, as it develops micro-fractures in the copper, and will eventually fail, use stranded core instead. 305 meters per Roll
